

Here is an example of a Power BI report and what we are aiming for with visual presentation of data with Ireland:

<https://www.youtube.com/watch?v=3wixxKMM5A4>

This was a session to showcase with Microsoft our work with Power Bi and our customer offering. As an assessment we would like the candidate to be able to use the dataset provided via this link and use this as a guide to help learn how to use the basics of power bi and present back to us:

<https://docs.microsoft.com/en-us/power-bi/desktop-getting-started>

Example data can be found here:

<http://download.microsoft.com/download/1/4/E/14EDED28-6C58-4055-A65C-23B4DA81C4DE/Financial%20Sample.xlsx>

We would like the visualisations to explain some of the following points :

1. Trends across time and what these show us
2. Which products are receiving the most discount and can we see why from the data
3. What recommendations would you make for this company to increase revenue and why ?

All these questions should be answered visually using the data that is created. If the candidate can forward the PBIX file including screenshots then that would be appreciated.
